YOUR YARD. YOUR SITE. WE HANDLE IT.

Ruck Excavating provides full industrial site work across the Lower Mainland and Fraser Valley. Yard regrading, drainage repair, lock block wall construction, culvert replacement, asphalt removal, utility trenching, concrete and rock breaking, mobile crushing, barge operations, access road construction. Whatever your property needs, we have the equipment and the experience to get it done right. Clear quotes, no surprises, and people who know what they are doing on every job.

INDUSTRIAL SITE SERVICES

YARD REGRADING & DRAINAGE

Rutted gravel yards, standing water, poor drainage. Regraded and reshaped to fix the problem at the source. Trucking yards, equipment dealers, recycling operations, aggregate and lumber yards.

LOCK BLOCK WALLS

Bin dividers, material storage walls, perimeter walls, and retaining walls. Concrete lock block design and placement with heavy equipment. Built to handle industrial loads and built to last.

CONCRETE & ROCK BREAKING

Hydraulic hammer on large excavator. Slabs, foundations, boulders, bedrock, lock blocks. Ongoing contracts welcome. Quarry background means safe, efficient hammer operations at any scale.

MOBILE CRUSHING

On-site crushing for asphalt and concrete recycling, aggregate processing, and gravel pit operations. Bring the crusher to your property, reduce haulage costs, and turn material into usable product on the spot.

CULVERT INSTALLATION & REPLACEMENT

Failed and undersized culverts replaced cleanly and efficiently. Access roads, farm drainage, industrial yard drainage. BC One Call coordinated on every dig without exception.

ASPHALT REMOVAL & BASE PREP

Full asphalt demolition, subgrade excavation and shaping, road base installation and compaction. Ready for paving contractor or finished gravel surface.

UTILITY TRENCHING

Water, sewer, electrical, gas. Clean and accurate trenching with full BC One Call coordination. Industrial, agricultural, and commercial sites throughout the Lower Mainland and Fraser Valley.

ACCESS ROAD CONSTRUCTION

New and upgraded access roads, yard circulation routes, and farm roads. Drainage ditching, road base, precision grading. Built to handle daily equipment and heavy truck traffic.

BARGE LOADING & UNLOADING

Fraser River barge operations. Material loading and unloading with heavy equipment. Waterfront and river corridor experience that most Lower Mainland contractors do not have.

EQUIPMENT

EXCAVATORS

- Large excavator, hydraulic hammer equipped
- Medium excavators for mid-scope site work
- Mini excavators for tight access and precision digs

TRACK EQUIPMENT & ATTACHMENTS

- Compact track loader, mulcher, grader blade, compactor
- Compactors, pad foot and smooth drum
- Hydraulic hammer, mulcher, buckets, specialty rigging

SPECIALTY

- Mobile crusher for on-site aggregate processing
- Full attachment range for any scope or site condition

RECENT PROJECTS

ROCK & CONCRETE BREAKING

Ongoing hydraulic hammer operations across active quarry and industrial environments. Bedrock, boulders, concrete slabs, and lock blocks processed safely and efficiently at scale.

HYDRAULIC HAMMER QUARRY
ONGOING

RAILWAY SIDING FOUNDATION & SITE PREP

Subgrade preparation, ballast installation, precision grading, and assisted placement of new track and switch assemblies adjacent to active CN rail corridor. Specialized safety protocols throughout.

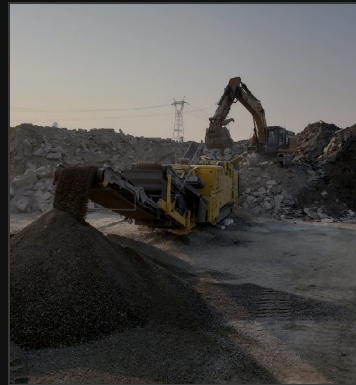

ACTIVE RAILWAY PRECISION GRADE
SAFETY PROTOCOLS

LARGE SCALE MATERIAL HANDLING

Heavy excavator operations across multiple large-scale industrial and civil sites. Material handling, precision grading, site preparation, and complex earthwork in demanding conditions.

LARGE EXCAVATOR
MATERIAL HANDLING CIVIL SCALE

ON-SITE CRUSHING

Need asphalt or concrete recycled on site? Have a gravel pit or quarry that needs mobile crushing? We bring the crusher to you. Process material on your property and eliminate haulage costs.

ASPHALT RECYCLING
CONCRETE RECYCLING
QUARRY & GRAVEL PIT CRUSHING

INDUSTRIAL BACKGROUND

ROCK QUARRY, CRUSHING & HEAVY INDUSTRIAL

Years of heavy equipment operation in active rock quarry and large-scale aggregate environments, including mobile crushing and high-volume material processing. Experience with pipeline proximity work, barge loading and unloading on the Fraser River, and large-scale municipal operations across the Lower Mainland. These are environments that build a different level of situational awareness, safety discipline, and equipment skill than standard site work.

RAILWAY CORRIDOR & SPECIALIZED SITE WORK

Hands-on track and siding construction adjacent to active CN rail corridor. Communication protocols, safety certifications, and precision equipment control in environments where errors have real consequences. Combined with a background in slope stabilization, geotechnical support, erosion control, and drainage work on complex sites, this is experience that most Lower Mainland excavation contractors simply do not have.

OUR STANDARD ON EVERY JOB

SAFETY FIRST

BC One Call on every dig. WCB current. \$5M liability. WorkSafeBC compliant on every job site, every time.

NO SURPRISES

Clear written quotes. Changes communicated before we proceed. No hidden charges on your final invoice.

ACCOUNTABILITY

Ruck Excavating stands behind the quality and safety of every job. You always know who to call.

CLEAN SITES

We show up when we say, work efficiently, and leave your site clean and organized when the work is done.
